

# ComT 2.0

## Commercial Solar Mounting System

The Clenergy PV-ezRack ComT 2.0 is a versatile and fast mounting system for PV installation on all commercial flat roofs. With its flexible and scalable design it enables perfect utilization of roof surface available. With tilt angles of 5°, 10°, 15° or East-West, the PV panels can generate a maximum output.

### Main Benefits

#### Integrated Cable Management

Compatible with high strength TUNNAL Rail, achieve a larger rail span than Eco-rail. Cables can be easily and safely managed in the channel.

#### Optimize Energy Output

The Legs can mount PV panels that width up to 1200 mm. Tilt angles: 5°, 10° and 15° options.

#### Easy and Quick Installation

With only one z-module fastener to the rail, pre-attached earthing pins and panel clamps held upright by a spring bolt, the COMT 2.0 system enables a seamless and fast installation.

### Technical Details

Module Orientation	Landscape
PV Module	Framed
Wind Region:	A, B1, B2, C, D
Roof Type	Flat Roof
Tilt Angle	5°, 10° and 15°
Material	Main Structure: AL6005-T5 Fasteners: SUS 304
Warranty	10 years 25 years*

\*25 Years warranty are available for projects designed and certified by Clenergy Engineering Services.

**Leg Assembly**

FL-COMT/Z/G & RL-COMT/Z/G

Pre-assembled Legs enable easy and fast installation. Manufactured from aluminum offers excellent corrosion resistance.

**SCO-ECO/380**

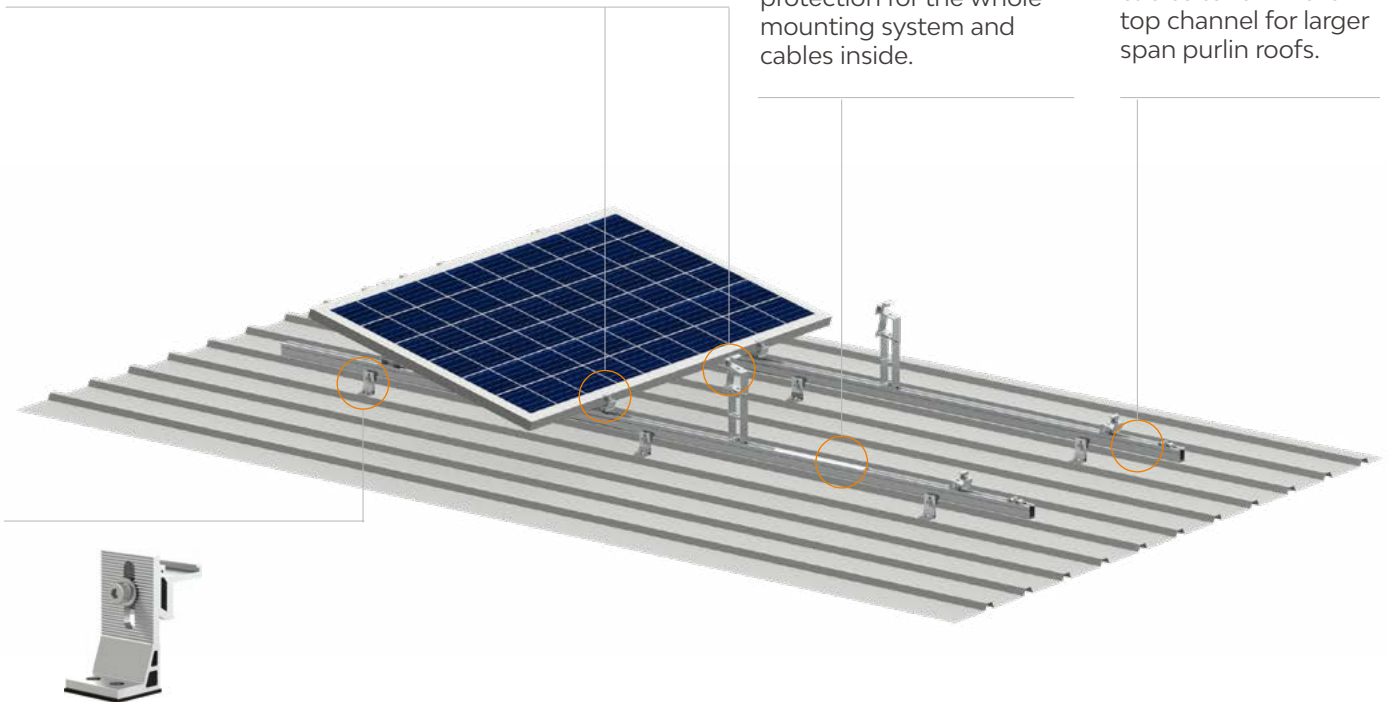

Side Channel Cover for ECO-Rail

Used as a cover for TUNNAL Rail, better protection for the whole mounting system and cables inside.

**ER-R-TUN/XXXX/MF**  
TUNNAL Rail

Integrated with cable management function, which allows cables to run in the top channel for larger span purlin roofs.

**ER-I-05A/EZC/MAX**

Tin interface A with ezClick connection and double screw inserts

The double inserts L-Feet provides a higher pull-out strength when installed in high wind zones compared to traditional L-Feet with single screw fixing.
